1 Learn features
Train 1077; validate 360
2 Freeze representation
32 tanh features + bias
3 Estimate MAP heads
Training; alpha grid
4 Exact training Hessian
330 x 330 precision
5 Gaussian posterior
Local head approximation
6 Validate predictions
Select prior by NLL
7 Lock all selections
Epochs, priors, seeds
8 Held-out integration
512 draws; 360 test images
9 Score probabilities
Recognition, NLL, Brier, MI
